Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Team ID	PNT2022TMID14568
Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dashboard
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Enables user to make registration for the application through Gmail
FR-2	User Confirmation	Once after registration, the user will get confirmation mail via Email platform
FR-3	Visualizing Data	User can visualize the trends on the heart disease through Dashboard created using IBM Cognos Analytics
FR-4	Generating Report	User can view his/her health report and can make decisions accordingly

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The application will have a simple and user-friendly graphical interface. User can understand the application easily. Any action has to be performed with just a few clicks

NFR-2	**Security**	User's Data privacy is implemented using the login verification process. After verification only the user is granted permission to access the IBM Cognos Analytics Tool
NFR-3	**Reliability**	The application has to be consistent at every scenario and has to work without failure in any environment
NFR-4	**Performance**	Performance of the application depends on the response time and the speed of the data submission. The response time of the application is direct and faster which depends on the efficiency of implemented algorithm
NFR-5	**Availability**	The application has to be available 24 x 7 for users without any interruption. The user can access the application anytime at anywhere to get the desired / accurate results
NFR-6	**Scalability**	Any number of users can generate the report accurately without any delay at the same time using this application
